

# 205 Remote Head

Egripment's Digital Head  
for the Modern Size Smaller Cameras

Advanced Technology, with the Passion and Style that Egripment is known for worldwide

Following in the footsteps of our very successful and well regarded line of Digital and Encoded Remote Camera heads and systems, Egripment now announces the development of a much smaller and lighter Remote Head designed for use with many of the current smaller professional cameras and lenses.

The 205 Remote Head offers the same exacting precision and smoothness of motion as our larger 306 Digital Head does, in a much smaller package. With the reduction in camera sizes, it is not always necessary or desirable to use our larger Digital or Encoded heads, so we now offer the 205 Head to fill this need in our line up.

Note that this head can be mounted right side up or inverted and furthermore you can mount the camera platform on the OUTSIDE of the head rather than inside as is customary, if desired for special applications. With its extensive line of mounting options, such as standard 28mm lightning spigot to fix to a standard clamp, Mitchell or 100mm bowl fitting for adapting it to standard tripod, the 205 Head is an economical head for many different purposes.

# 205 Remote Head

Digital and Encoded for smaller Cameras

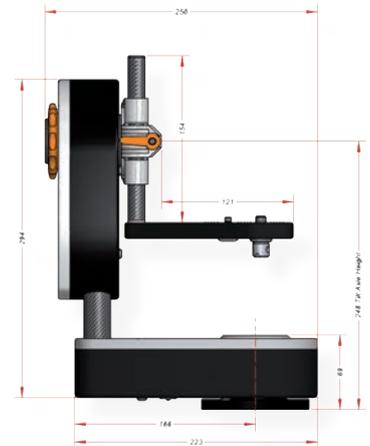

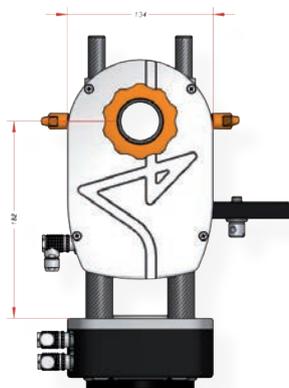

The 205 Digital Remote Head is replacing our Minishot Digital and Super Shot Heads in the Egripment Product Line. It is fully compatible with all of the other products within our line of Digital Remote Systems and can easily be integrated within a new or existing Egripment Virtual or Augmented Reality System as well as being utilized as a Stand Alone Remote Head.

The smaller size and lighter weight of the 205 Head, offers a number of additional features to the creative operators and studio technicians. Live operation, or Studio Automation in combination with Virtual and Augmented reality has never been this economical and easy to achieve.

Specifications	Art.: 205	
Height:	29.4 cm	11.57 inch
Width:	25.0 cm	9.84 inch
Depth:	13.4 cm	5.27 inch
Weight:	7.5 kg	16.5 lbs
Load capacity:	10 kg	22 lbs
Min Speed:	360 ° in 48 min	
Max Speed:	360 ° in 1,5 sec	
Voltage:	24 V DC   30 Watt
