

## Enhance your images with ECLIPSE

- Flexible light control without changing filters
- The Eclipse is the only ND filter you will ever need
- Easily rotates to fine tune the amount of light entering your lens
- Variable neutral density from 2 to 8 stops
- Superior colour fidelity and optical clarity
- Ideal for both photo and video
- Expands your creative options
- Create motion blur in your photos by increasing exposure with ease
- Enhance your videos by reducing depth of field to achieve the film look
- Super thin with expanded front element to minimize vignetting
